## TECHNICAL SKILLS

---

**Frontend:** JavaScript, React, Redux, Angular, TypeScript, Bootstrap, Tailwind CSS, Figma

**Backend:** Java, Spring Boot, JPA, Spring Security, RESTful APIs, Kafka, RabbitMQ, Redis

**DevOps:** Aws, Spring Cloud, GCP, Docker, Kubernetes, Jenkins, ansible, Git

**Database:** MySQL, PostgreSQL, MongoDB

## PROJECTS

---

### ECOMMERCE - [\[Link\]](#)

- Developed a scalable multi-vendor e-commerce platform supporting customers, vendors, and administrators with **JWT-based authentication** and Spring Security.
- Designed RESTful APIs for product, category, inventory, cart, Wishlist, order, payment, and user management using Spring Boot and **Hibernate/JPA**.
- Built vendor and **admin dashboards** for inventory management, order processing, sales analytics, commission tracking, and user administration.
- Integrated payment gateway, email notifications, and asynchronous order processing using **Kafka/RabbitMQ** to improve system responsiveness and **caching** with **Redis**.
- Optimized database performance through efficient JPA mappings, indexing, pagination, and caching strategies.
- Applied MVC architecture, SOLID principles, centralized exception handling, and Git-based version control to build a maintainable, production-ready application.
- Containerized the application with **Docker** and designed it to be deployment-ready for cloud environments.

### YOUTUBE SEO TOOL - [\[Link\]](#)

- Developed a full-stack YouTube SEO tool that analyses **video metadata** and generates optimized **SEO tags** to improve search visibility.
- Integrated **YouTube Data API v3** using Spring Web Client to retrieve video details, thumbnails, channel information, statistics, and related content.
- Designed a responsive interface using React.js/Thyme leaf and Tailwind CSS featuring video analysis, thumbnail preview, and **thumbnail download** functionality.
- Implemented SEO recommendations including keyword **suggestions**, **hashtags**, and engagement analytics.

### BLOGGING APPLICATION - [\[Link\]](#)

- Developed a full-stack blogging platform, enabling users to create, edit, publish, and manage blog posts.
- Designed **RESTful APIs** using Spring Boot and Hibernate/JPA for blog management, user authentication, comments, and category management.
- Developed a comment and moderation system with validation, centralized **exception handling**, and optimized database operations.
- Optimized MySQL database performance using **JPA relationships**, lazy loading, and efficient query execution

## EDUCATION

---

**Swami Vivekananda Institute of Technology**  
Bachelor of Computer Science - CGPA: 7.9 / 10

**Aug 2020 – May 2026**  
Hyderabad - Telangana

## CERTIFICATIONS

---

- Advanced Java & Spring Boot Certification
- Gained Official AWS Certification
